YOUR FIRST 10 MINUTES

Get started, step by step

Use this short checklist to get from opening TrikeServe to finding your next action.

1 min

Choose your role

Use the account guide: Customer for rides or food; Driver or Business if applying for those roles; Administrator only if access was assigned.

2 min

Open TrikeServe and create an account

Select Sign up, enter an email you can access, create your password, and choose the matching account type.

3 min

Verify your email and sign in

Check Inbox and Spam/Junk for the verification message, then sign in. If it does not arrive, see email verification help.

2 min

Allow location when needed

Allow location access for map and nearby features, or enter a location manually when the screen offers that option.

2 min

Open your role's guide and confirm your next step

Go to the Customer, Driver, Business, or Administrator section. Driver and Business tools require approval.

Ready to try a service?

Customers can follow the ride booking or food ordering walkthrough. Before submitting, double-check pickup/delivery details and totals.

BEFORE YOU SIGN UP

Which account do I need?

Choose the option that matches what you want to do in TrikeServe.

I want to book rides or order food

Choose **Customer**. This is the standard account for passengers and people ordering from local shops.

Go to customer guide →

I drive a tricycle and want ride requests

Apply as a **Driver**. An administrator must approve your account before driver tools are available.

Go to driver guide →

I run a shop and want to receive orders

Apply as a **Business**. Your shop account needs administrator approval before its workspace opens.

Go to business guide →

I am assigned to manage TrikeServe

Administrator access is assigned by the platform. It is not a general sign-up choice.

Go to administrator guide →

Not sure? Start with a Customer account. Don’t choose Driver, Business, or Administrator unless that describes your role and you have followed the required approval or assignment process.

> **After choosing:** Sign up or sign in · Compare account permissions

01 · FIRST STEPS

Start with the basics

TrikeServe brings local rides and food delivery together. Use the account that matches how you participate.

Customer

Book a ride or order food.

EVERYONE CAN START HERE

Driver

Manage availability and ride requests.

APPROVAL REQUIRED

Business

Manage your shop and customer orders.

APPROVAL REQUIRED

Administrator

Oversee users and platform operations.

ASSIGNED ACCESS

Good to know

Driver and business accounts need administrator approval before their dedicated workspaces become available. While approval is pending, sign-in takes you to the customer experience.

Quick-start checklist

- [x] Choose the role that matches what you will do.
- [x] Have access to the email address you register with.
- [x] Allow location access when booking trips or using nearby/map features.
- [x] Confirm your role-specific home screen after signing in.

1. **Open TrikeServe**

   Use the web app on your phone or computer. Allow location access when you want nearby options or location-based ride features.

2. **Sign in or create an account**

   Use your email and password. Choose the appropriate account role during sign-up.

3. **Go to your home screen**

   After sign-in, TrikeServe opens the workspace for your active role. Follow the matching guide below.

02 · ACCOUNTS & ACCESS

Choose the right account

Your role controls the tools available to you. Use your own account; don't share sign-in details.

ACCOUNT	BEST FOR	ACCESS NOTES
Customer	Booking rides, browsing restaurants, ordering food, checking activity and messages.	Standard account; sign up and verify your email if prompted.
Driver	Setting availability, viewing requests, completing rides and reviewing earnings.	Requires administrator approval; until approved, the customer workspace is shown.
Business	Managing a restaurant profile, menu, incoming orders and order progress.	Requires administrator approval; pending accounts can use the customer workspace while waiting.
Administrator	Managing platform users, approvals, TODA terminals, fares and settings.	Access is assigned. Some administrators are scoped to a terminal or assigned responsibilities.

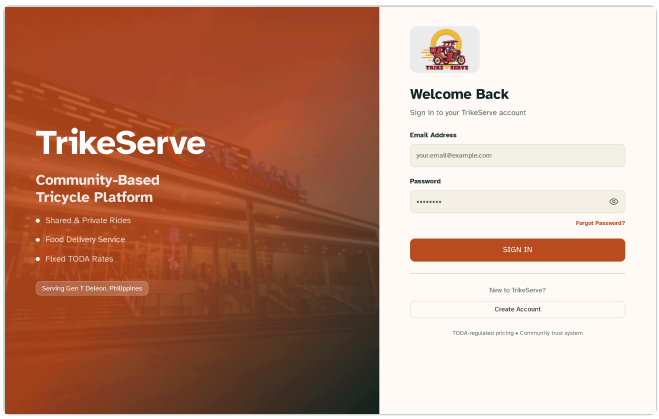

Approval is not the same as sign-up.

Submitting a driver or business application does not immediately unlock its dedicated dashboard. Contact your platform administrator if your application is pending.

03 · ACCESS YOUR ACCOUNT

Sign in or join

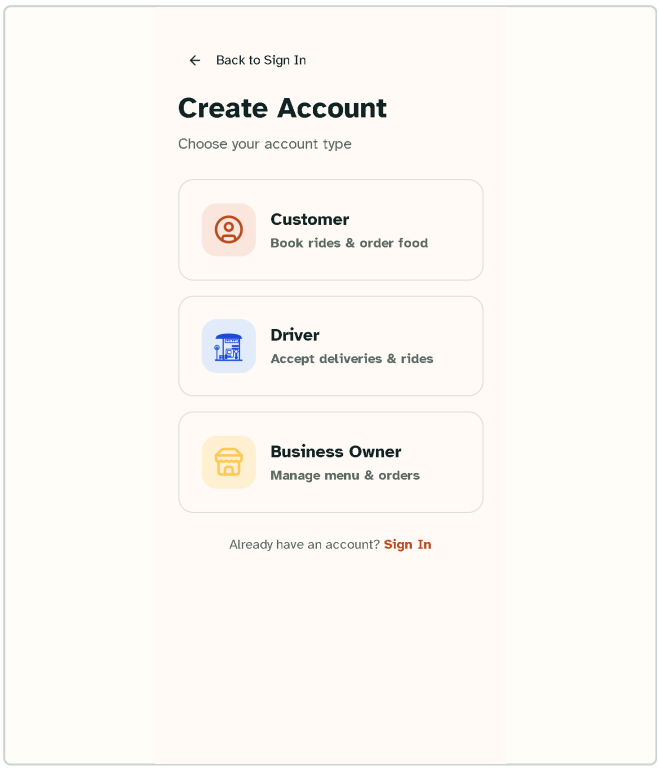

Keep your email current so you can receive verification and account messages.

SCREENSHOT 01

Sign in

Enter your email and password in the sign-in fields, then select **Sign In**. Use **Forgot Password?** if you need to reset your password.

SCREENSHOT 02

Create an account

Choose your role in the account-type selector, complete the required fields, then select the sign-up button. Driver and Business applications need approval.

1. **Enter your email and password**
   Check for typing errors and use the password associated with this account.
2. **Verify your email if asked**
   Look for the verification message in your inbox and spam folder. The sign-in screen may offer a resend option.
3. **Need a reset?**
   Select **Forgot Password?** and follow the instructions sent to your email.

FOR PASSENGERS & FOOD LOVERS

Customer guide

Arrange a local trip, discover nearby food, and keep track of what you've requested.

Your home screen

Start from the customer home page. Choose the ride or food service you need, and use the navigation to return to your home, activity, messages, or account area.

SCREENSHOT 03

Customer home

Tap the ride or food service card to begin. If prompted, confirm the pickup or delivery location before continuing.

01

Book a ride

1. Open the ride booking option.
2. Choose your pickup and destination.
3. Review the available ride details and fare shown.
4. Confirm your request and follow its status in Activity.

Use the location pin carefully. Confirm pickup and drop-off details before submitting.

02

Order food

1. Open the food section and choose a restaurant.
2. Browse its menu and select an item.
3. Choose any available options and add it to your cart.
4. Review the cart, delivery details and total, then place the order.

Restaurant availability, menu choices and order progress are shown in the app.

03

Track activity

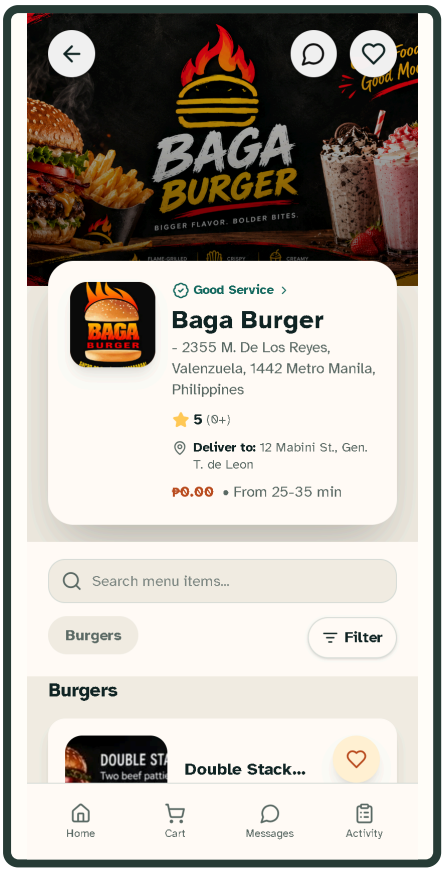

Use Activity to review your ride and food requests and check their current status. Open a relevant item for more details when available.

04

Messages & account

Use Messages to view conversations available to your account. Visit Account to review or manage your profile information, then sign out when you finish on a shared device.

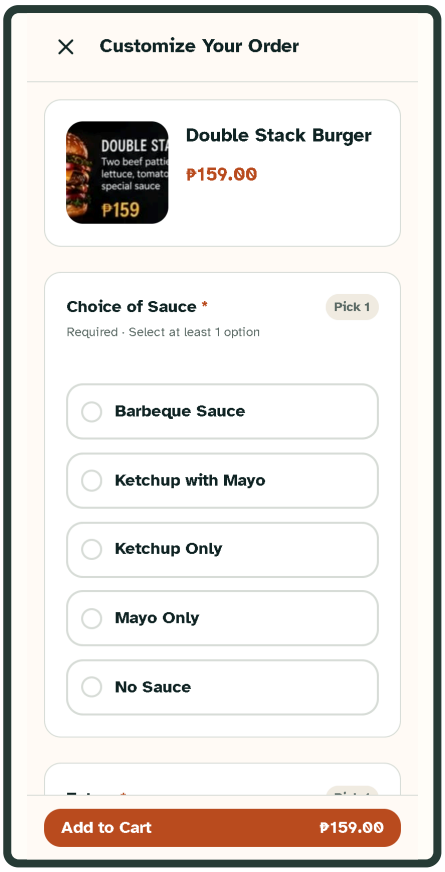

Food ordering, step by step

SCREENSHOT 04

Pick a restaurant

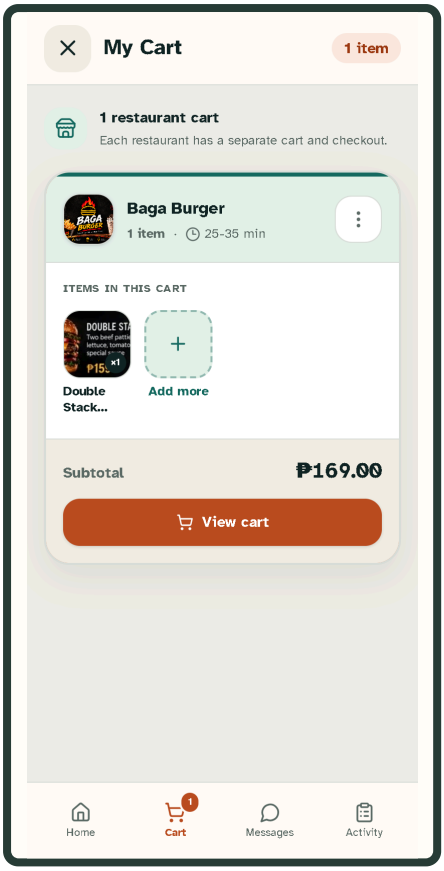

Tap a restaurant card to open its menu and shop details.

SCREENSHOT 05

Choose item options

Select the available item options shown, then tap **Add to Cart** to continue.

SCREENSHOT 06

Review your cart

Check item quantities, delivery details and total, then use the checkout/place-order button shown.

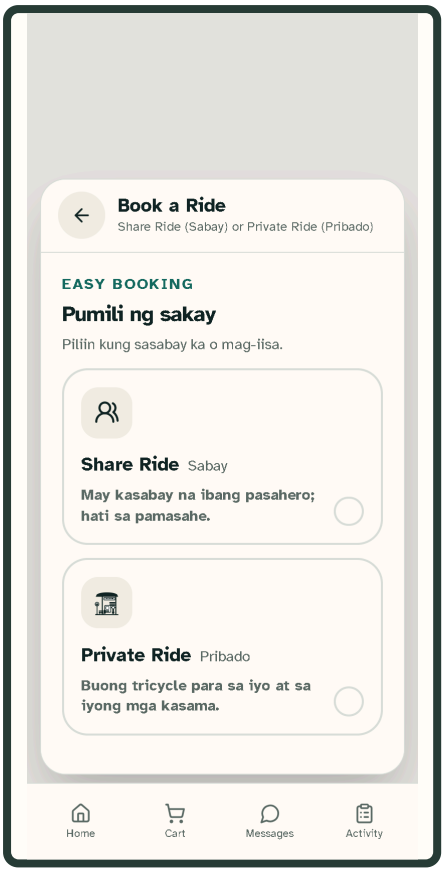

SCREENSHOT 07

Follow your activity

Open **Activity**, then select the ride or order card to review its status.

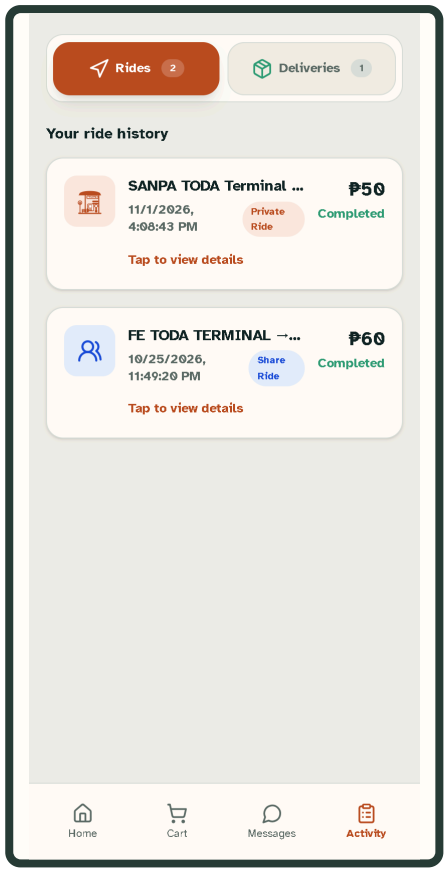

Ride booking

SCREENSHOT 08

Set up your trip

Enter pickup and destination in their location fields, review the fare/details, then tap the ride request button.

SCREENSHOT 09

Check ride status

Open **Activity** and select your ride request to view its latest status.

Before submitting a request

- [x] Pickup/delivery point and destination/address are correct.
- [x] Review the fare or order total and any item options.
- [x] Keep the app open and check **Activity** for status updates.

> **Related:** Ride or order didn't go through? · Safety and account tips

> **Before you confirm**
>
> Make sure the pickup point is easy for your driver to identify, the destination is correct, and you've reviewed any fare or order total displayed.

FOR APPROVED DRIVERS

Driver guide

Set your availability, review incoming requests, and manage your work from the driver area.

Approval first

Driver accounts require administrator approval. If you are still pending, you'll see the customer experience until approval is complete.

Start a shift and handle requests

1. **Open the driver dashboard**

   Review your status and available driver tools.

2. **Set your availability**

   Use the dashboard controls to indicate when you are available. Only go online when you are ready to accept work.

3. **Review a request before accepting**

   Check the details shown for the passenger, trip and pickup before choosing to accept.

4. **Keep trip information current**

   Use the ride workflow to update progress, and follow the in-app directions and status prompts.

5. **Review earnings**

   Open Earnings to review the information available for your completed work.

SCREENSHOT 10

Driver dashboard

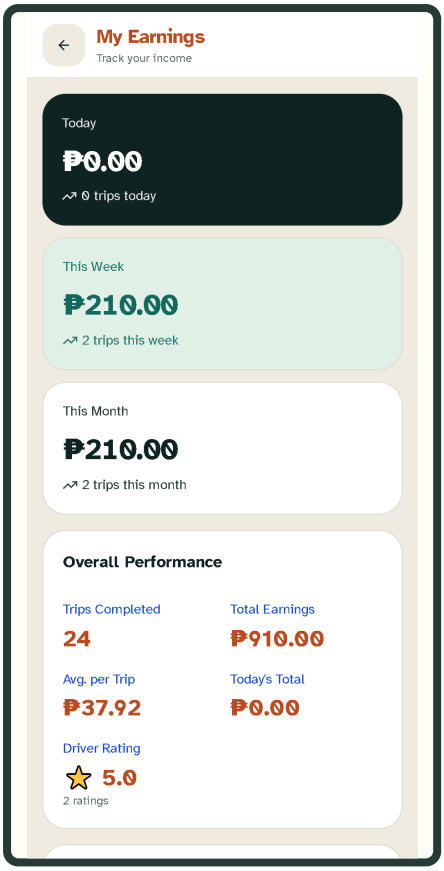

Check your online/availability control before accepting requests; use the dashboard action shown to go online or offline.

SCREENSHOT 11

Ride requests

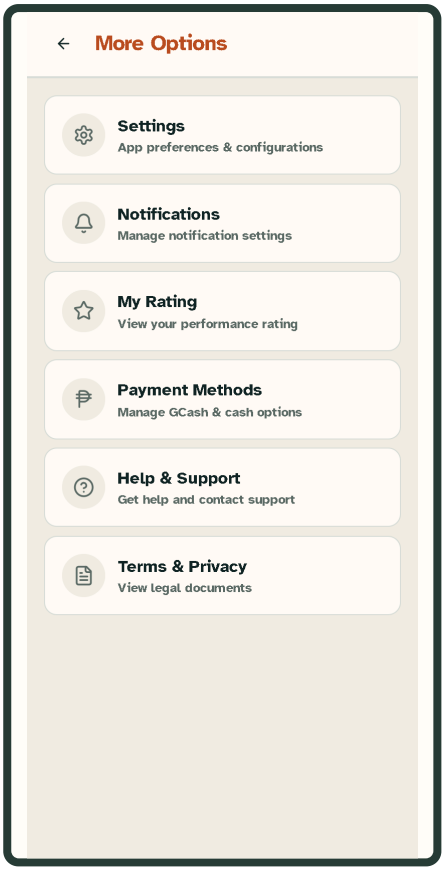

Review pickup, destination and passenger details, then use the request's **Accept** or decline action.

SCREENSHOT 12

Earnings

Open **Earnings** from the driver navigation to review the totals and completed work shown.

SCREENSHOT 13

More options

Open **More** to find additional driver and account tools.

Before going online

- [x] Confirm your driver profile and vehicle details are current.
- [x] Check that your phone has charge and a working connection.
- [x] Set availability only when ready to accept and complete work.

> **Related:** Having trouble with a ride? · Driver account approval

> **Be ready before going online**
>
> Keep your phone charged, confirm your vehicle and driver details are current, and only accept trips you can safely complete. Follow local TODA procedures and applicable traffic rules.

FOR APPROVED LOCAL SHOPS

Business guide

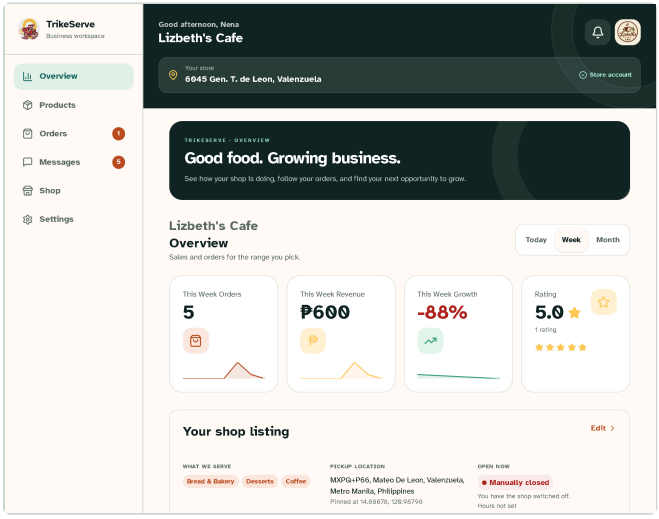

Keep your shop information and menu up to date, then manage incoming customer orders.

Approval first

Business accounts require administrator approval. If your shop is pending, use the customer workspace while you wait, then contact an administrator if you need a status update.

Set up and run your shop

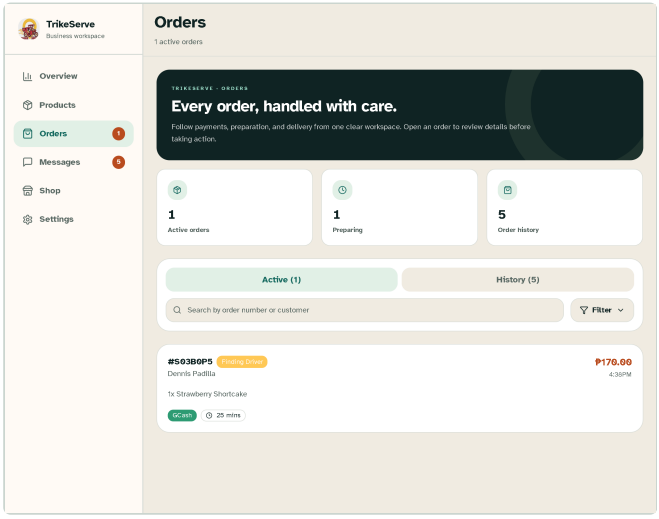

1. **Open the business dashboard**
   Review the shop overview and any order or setup prompts.
2. **Check your business profile**
   Confirm your business name, address and other visible details are accurate.
3. **Maintain your menu**
   Add or update the items and options your shop offers. Check names, descriptions and prices carefully.
4. **Monitor new orders**
   Open Orders to review incoming requests. Follow the in-app workflow to progress each order.
5. **Keep availability realistic**
   Make sure the menu and order status reflect what your shop can prepare and fulfill.

SCREENSHOT 14

Business dashboard

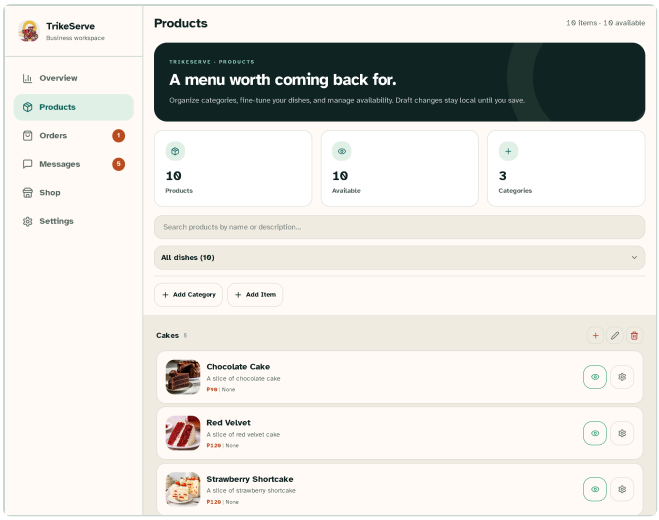

Review the order summary and shop status; use the dashboard's order/menu controls to continue.

SCREENSHOT 15

Orders

Open an order card to review its items and details, then choose the available status action.

SCREENSHOT 16

Menu management

Use the menu controls to add or edit an item; verify its name, price and availability before saving.

Opening checklist

- [x] Check that your shop profile and address are accurate.
- [x] Review menu prices and item availability.
- [x] Check incoming orders regularly and update their status in the app.

> **Related:** Order problems and pending approval · Business account selection

> **Good menu hygiene**
>
> Review item availability and prices regularly. If an item can’t be prepared, update its availability promptly and follow the app’s order handling steps.

FOR AUTHORIZED OPERATORS

Administrator guide

Manage access and operational settings with care. Available controls can vary by administrator assignment.

> **Use administrator access responsibly**
>
> Only authorized staff should use administrative tools. Confirm the account and record you intend to change before saving. Some driver administrators are limited to their assigned terminal.

Common admin tasks

A

Review overview

Use the overview to orient yourself and see the operational information available to your account.

B

Manage users

Find user accounts and review the information available in the user-management area.

C

Handle approvals

Review driver and business applications and approve only when the required checks are complete.

D

Maintain TODAsettings

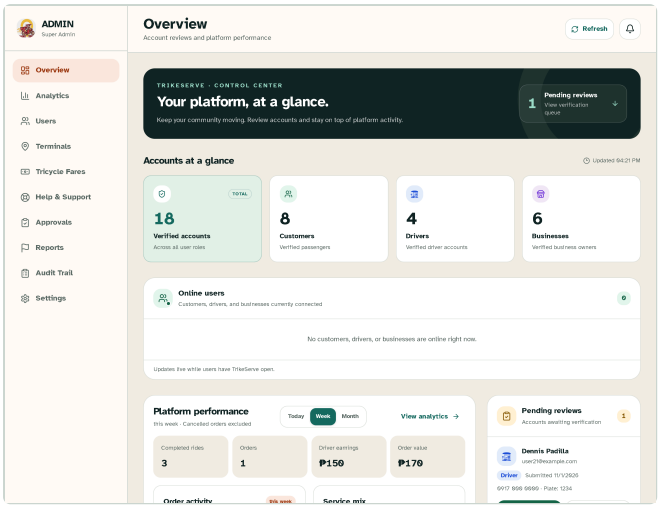

Use the terminal, fare and settings areas for the operational controls assigned to your role.

Before making a change

- [x] Confirm your assigned terminal and administrator scope.
- [x] Review the target account or setting before editing.
- [x] Verify the saved result in the relevant list or overview.

> **Related:** Account and access troubleshooting · Who should use Administrator?

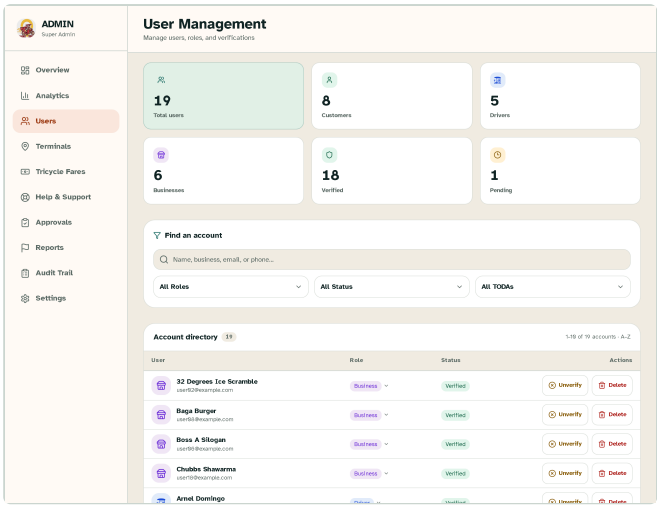

1. **Confirm your scope**
   Check which terminal and admin tools are available to your account.
2. **Review pending approvals**
   Validate submitted details before changing an application’s status.
3. **Make deliberate edits**
   Review fares, terminal records and settings before saving, especially when changes affect multiple users.
4. **Verify the result**
   Return to the relevant list or overview and confirm the change appears as intended.

SCREENSHOT 17

Overview

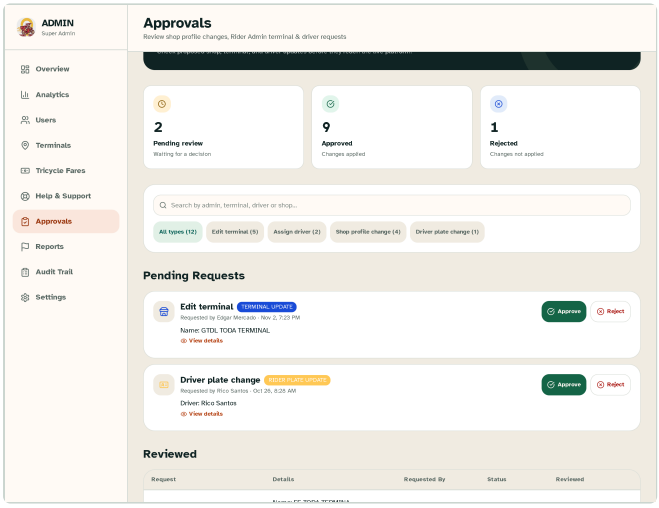

Use the overview cards and navigation to open the administration task you are assigned.

SCREENSHOT 18

Users

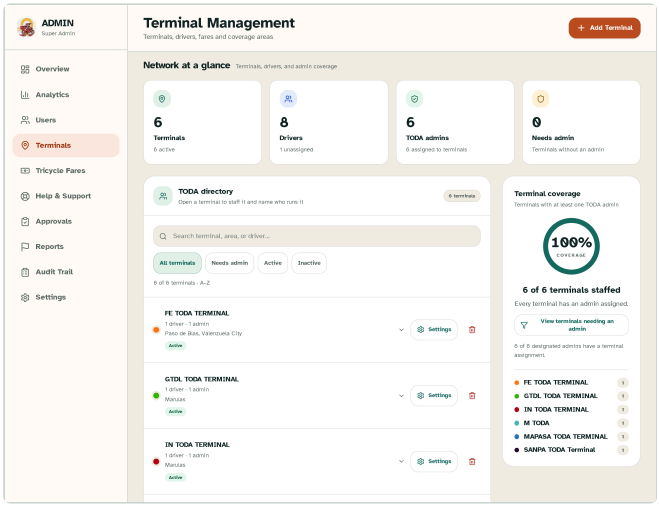

Search or select a user row to review the account; check the role and identity before editing.

SCREENSHOT 19

Approvals

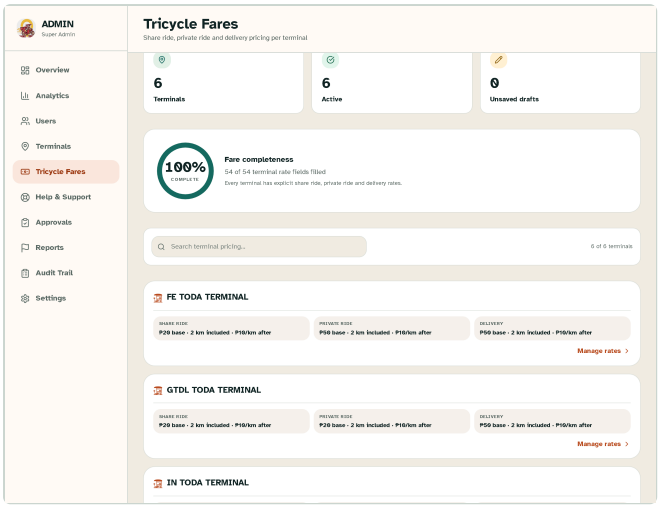

Open a pending application, verify its submitted details, then use the approval action only when checks are complete.

SCREENSHOT 20

Terminals

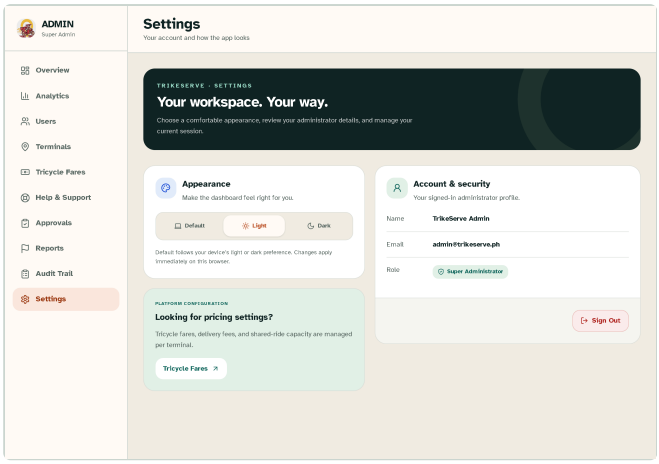

Select the assigned terminal and review its details before making permitted changes.

SCREENSHOT 21

Fares

Review the fare fields and values carefully, then save and confirm the displayed result.

SCREENSHOT 22

Settings

Change only settings assigned to your scope; review the selected values before saving.

HELP · QUICK FIXES

Troubleshooting

Try these checks first. If it still doesn't work, contact your TrikeServe/platform administrator.

Location permission or map is not working

1. Open your browser or device settings and allow location access for TrikeServe.
2. Return to the app and reload the page or reopen the ride screen.
3. Check that your device location service and internet connection are on.
4. If permission is unavailable, enter or adjust the location manually where the screen allows it.

Only share location while using features that need it.

I did not receive an email verification message

1. Check that you entered the correct email address.
2. Check Inbox, Spam/Junk, and any filtered folders.
3. Use the resend option on the sign-in screen, then wait a few minutes before trying again.
4. If the address is wrong or the message still does not arrive, contact support/admin for help with the account.

Never share your password or verification code with anyone.

Driver or Business approval is still pending

1. Sign in with the same email used for the application.
2. Pending accounts may be sent to the Customer workspace; this does not necessarily mean the application was rejected.
3. Contact a platform administrator to check the application status and whether details are missing.
4. After approval, sign out and back in if the dedicated workspace does not appear.

Administrator access is assigned; it is not activated by a public sign-up.

Aride request failed or is not showing

1. Check your connection, pickup and destination, then retry once if no request appears in Activity.
2. Open **Activity** to see whether the request was created or its status changed.
3. If the request appears pending, avoid submitting duplicates; refresh and check again.
4. If it repeatedly fails, note the time and any on-screen message and contact support/admin.

An order failed, is delayed, or has the wrong details

1. Check the cart, selected options, delivery address and displayed total before placing the order.
2. Open **Activity** and check whether the order was placed before trying again.
3. For a placed order, use the order details or in-app messages if available; do not create a duplicate while its status is unclear.
4. Contact the shop or platform administrator with the order details if the issue remains.

When contacting support

Include your account role, the approximate time, what you were trying to do, and the exact on-screen message. Do not send passwords, verification codes, or payment credentials.
Use the in-app help/contact option if available, or ask the TrikeServe/platform administrator for Gen. T. de Leon.

06 · TAKE CARE

Safety & account tips

A few small habits help keep your account and community safer.

Protect your sign-in

Use a password you don’t share. Sign out on shared or public devices and don’t leave a logged-in screen unattended.

Check trip and order details

Confirm pickup, destination, order contents and totals before sending a request.

Use location thoughtfully

Location access supports map and nearby features. If you deny it, some location-based workflows may need manual input or be limited.

Keep information current

Update contact, shop or driver information when it changes. Contact an administrator for account-access or approval issues.

07 · QUICK ANSWERS

Common questions

If these steps don’t resolve it, contact your TrikeServe administrator.

Why do I see the customer home instead of my driver or business dashboard? +

I can’t sign in. What should I try? +

Where can I see the status of a ride or food order? +

Why can’t I see every administrator option? +

Location or map features aren’t working. What can I do? +
